

## LanScope Cat on AWS Startup Guide

## Thank you for subscribing to LanScope Cat on Amazon Web Services (AWS). Please follow the steps below to get started!

1. After logging onto the EC2 instance, the LanScope Cat provisioning process will launch. A command prompt window will appear with messages. Please wait until you get the "Press any key to continue" message. It takes about 3–5 minutes to complete the process. Once the message appears, you can press any key to close the prompt.

C//Windows/System22jcmd.exe	-	×
BUCEESS: The parawaters of scheduled task "CatAWIEStup" have been changed. Lanccope Cat provisioning has started. It may take several minutes Please wait until the processing completed. Active code page: 65001		^
The proces succeeded. Wress any key to continue

Figure 4: Changing Administrator Password

The first time you log in, the Starter Navi screen prompts you to set up your initial configurations, including:

- Data Update task
- Log Search Data task
- Backup tasks including Database backup and CSV file backup
- Group and policy setup

Please refer to the *LanScope Cat Starter Navi Guide* for detailed instructions on setting up your initial configurations within the LanScope Cat Console.

The Tutorial screen will also pop up at login. This interactive menu provides instruction on using the LanScope Cat Console to do a task. You can access this Tutorial menu at any time by navigating to Guide tab > Tutorial in the console.

Figure 5: Tutorial Navigation

**4.** To access the LanScope Cat Web Console, navigate to Guide tab > Web Console menu. Log in to the Web Console by using the default credentials below:

Username: Administrator Password: motex

Figure 6: LanScope Cat Web Console Login

The default password can be changed by clicking Account in the Settings menu on the left. *Note: We recommend bookmarking the site URL for future access.* 

 To make a LanScope Cat agent installer, navigate to Client tab > Settings menu > Create Installer (under MR Management). After creating the installer, copy and paste it additional PCs to install. For detailed instructions on creating and installing the agent installer, please refer to the <u>LanScope Cat Agent Installation Guide</u>.
